Release Note Status:	Not Needed
Affected Platforms:	All

Description

In the CNN fonts Universal_0-9+_NoRej and Universal_0-9+_Rej, the following characters, which according to the documentation should be available, are missing:
#, &, (,), <, >, =, @
Either the documentation or the font should be adapted.

Comments

Comment by Michael Klostermann [07.10.2016]

If fixed it with a retraining of the classifiers.

Now every Universal font with a + has the same special chars.

I added an autotest which checks that this is the case, so we can close this ticket.

Comment by Michael Klostermann [07.10.2016]

autotest exists
